ISS Integrated Solutions

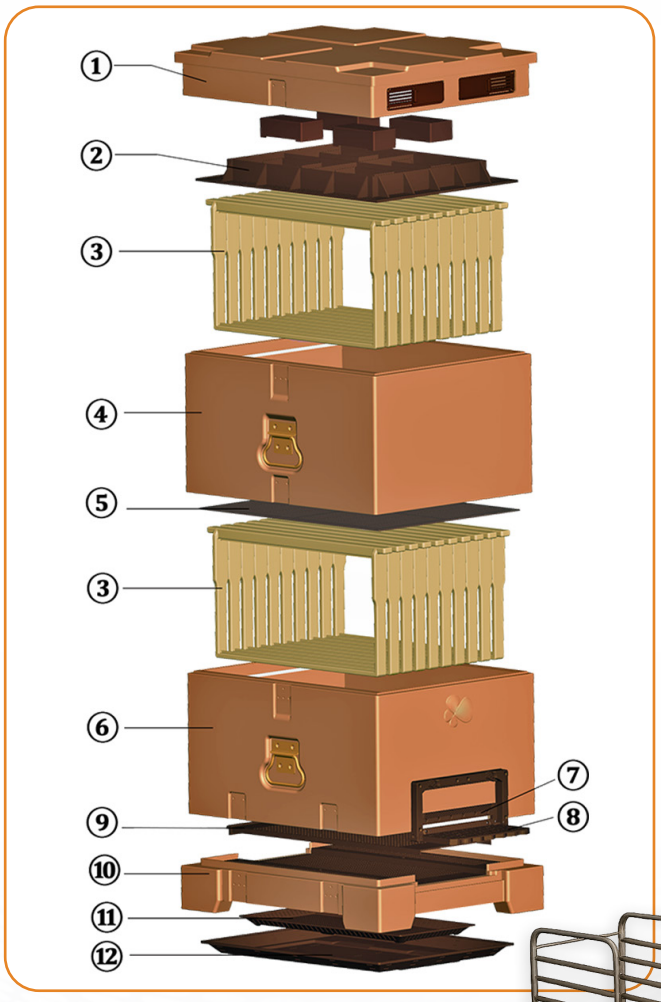

5 PL Logistical, Exim & Sustainable Packaging Solutions

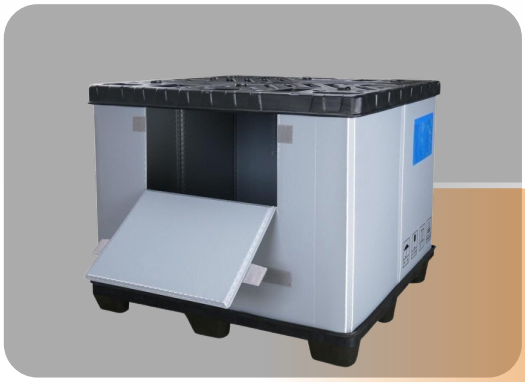

INNOVATING LOGISTICS.

ENGINEERING PACKAGING.

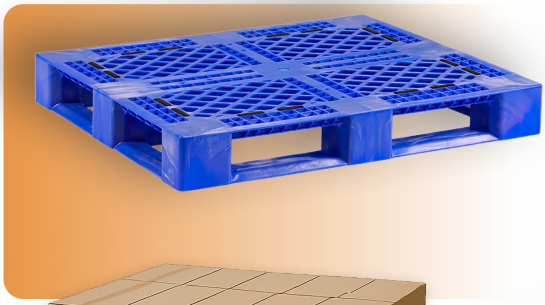

EMPOWERING INDUSTRIES.

SUSTAINABLE SOLUTIONS.

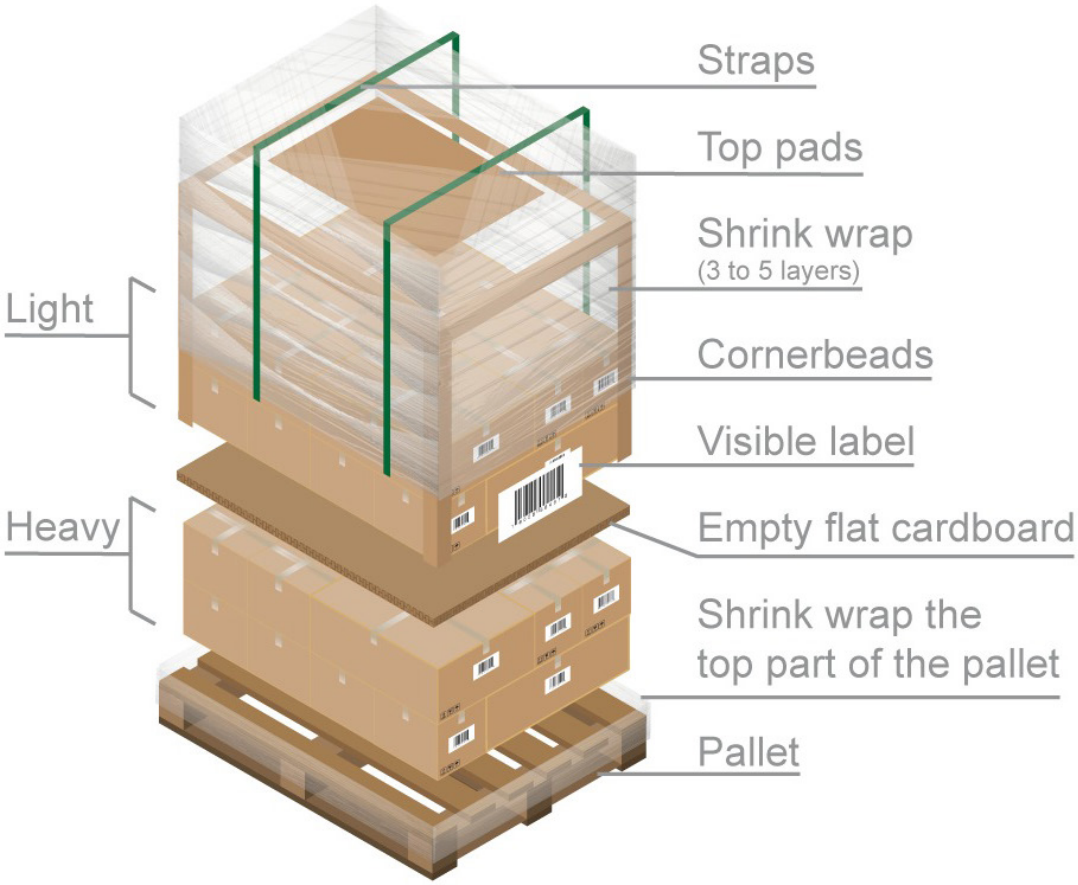

At the core of our operations lies a promise—competitive pricing, superior quality, and dependable service—crafted to meet every client's unique needs without compromise

About Us

At JSS Integrated Solutions, we offer a full spectrum of packaging and 5PL logistics services (consulting, audit, assistance, specific developments) meticulously engineered for the automotive, heavy engineering, and machine & tool die sectors. Our strength lies in providing custom-built, compliant, and sustainable solutions that integrate packaging with advanced logistics for seamless supply chain performance. Below is a summary of our complete offerings:

WHY CHOOSE US

Sustainability- Circularity- Digitization- Savings on Resources are embedded in our DNA.

If You are looking for a comprehensive end to end supply chain solution for the growth of your business, JSS solutions is the answer to all your supply chain challenges:

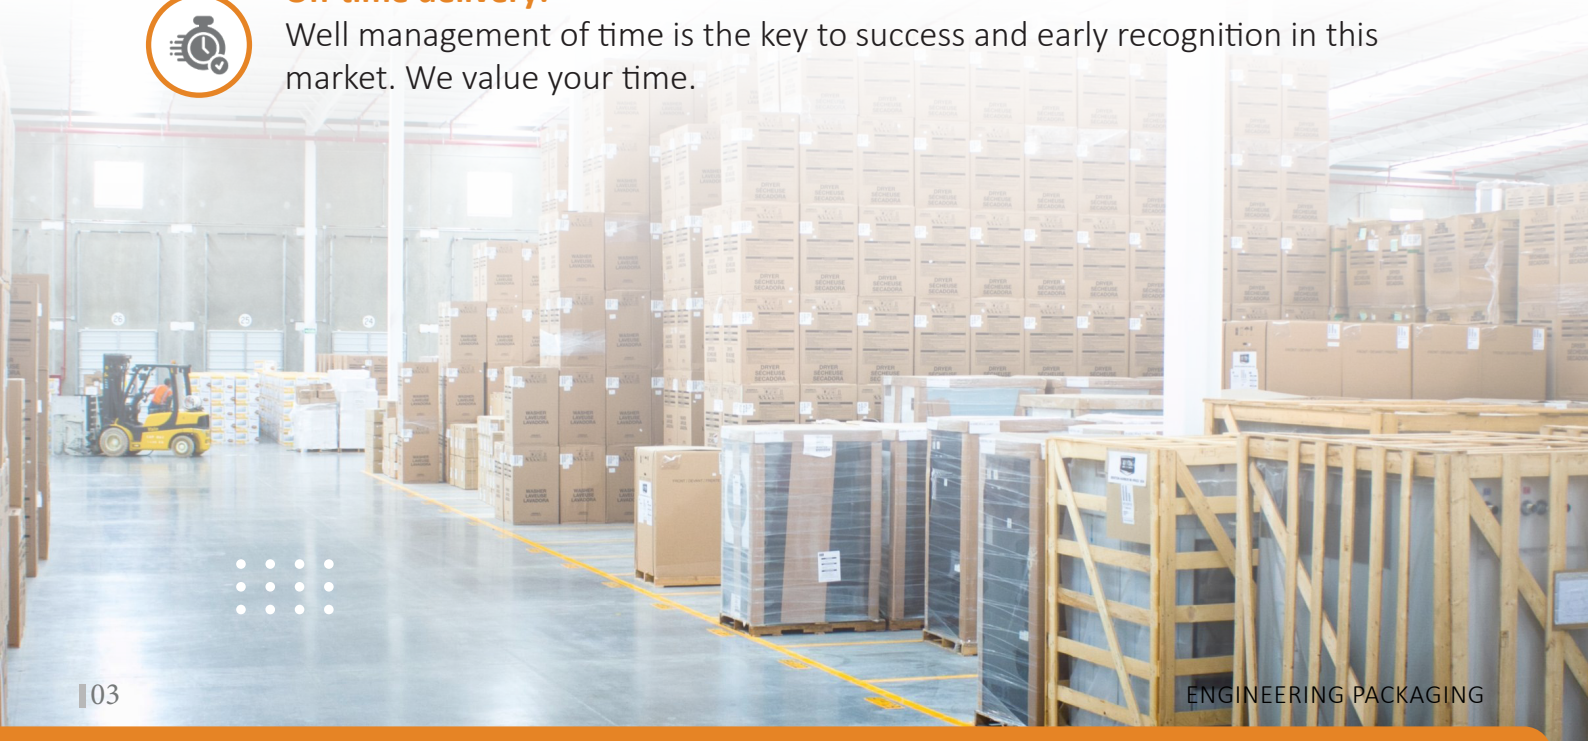

Comprehensive Supply Chain Solution:
Right from product packaging to transportation to its destination.

Experience and understanding of supply chain challenges:
we are driven by the deep understanding of supply chain challenges faced by the industry.

Cost Effective and efficient Solutions:
Your growth is our success and we are committed to provide efficient supply chain product packaging solutions at very reasonable prices for the growth of your business.

Environmentally Sustainable:
Our early success in this industry is due to our unique holistic approach that includes all the aspects of the supply chain to minimize environmental impact.

On-time delivery:
Well management of time is the key to success and early recognition in this market. We value your time.

01. WOODEN PACKAGING SOLUTIONS

01

PLYWOOD BOXES FOR LIGHTWEIGHT APPLICATIONS.

02

ISPM-15 CERTIFIED WOODEN CRATES & BOXES FOR EXPORT PACKAGING

03

SKIDS AND CUSTOM PALLETS FOR HEAVY-DUTY EQUIPMENT

2. CORRUGATED PACKAGING

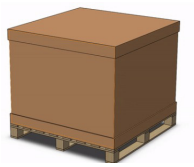

a. Single, Double & Triple Wall Corrugated Boxes

Use Case:

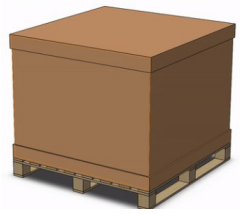

- Packaging for light (single), medium (double), and heavy (triple)
- weight components.
- Suitable for automotive parts, spares, and industrial equipment.
- Ideal for both domestic distribution and export packaging.
  Used for stacking in warehouses and on pallets.

Benefits:

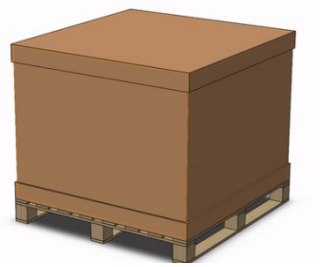

- Provides strength and protection tailored to load requirements.
- Prevents product damage during handling and transit.
- Lightweight and cost-efficient for shipping.
- 100% recyclable and environmentally friendly.

3 Ply Single Wall

5 Ply Double Wall

7 Ply Triple Wall

b. Corrugated Trays, Pads, and Partitions for Part Separation

Use Case:

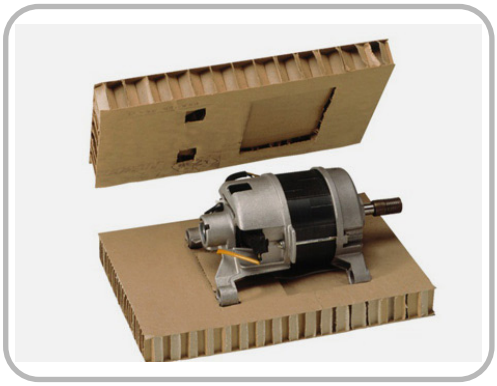

- Separates individual components within a master box.
- Used for delicate, painted, or precision parts.
- Supports organized packing of multiple small items.
- Prevents contact between components during transit.

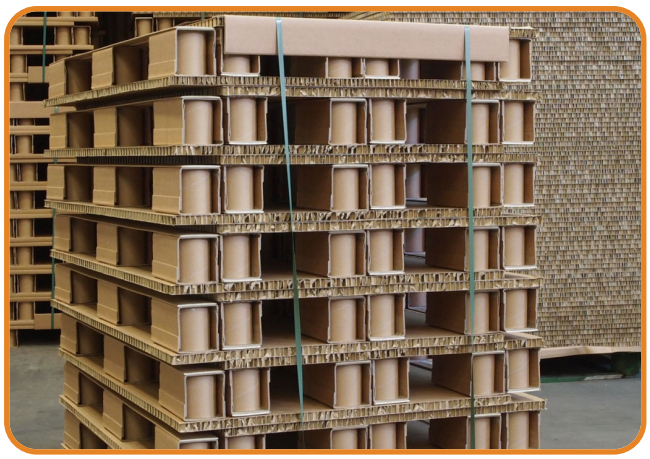

Benefits:

- Minimizes risk of scratches, dents, or movement.
- Improves space usage and part arrangement.
- Speeds up packing/unpacking at assembly points.
- Custom-designed for each product or application.

3. HONEY COMB PACKAGING

a. Honeycomb Boxes and Pallets for Export and Heavy-Duty Products

Use Case:

- Designed for exporting large, heavy, or fragile equipment.
- Ideal for dies, engine blocks, and tool assemblies.
- Used in long-distance logistics (air, sea, and road).
- Supports stacking and stability in containers and trucks.

Benefits:

- High load-bearing strength with lightweight construction.
- Excellent impact resistance for international shipping.
- Eco-friendly and fully recyclable alternative to wood.
- Meets global packaging and ISPM-15 compliance standards.

b. Printed And Plain Formats For Branding And Identification

Use Case:

- Printed boxes for brand visibility.
- Compatible with barcodes, part numbers, and labels.
- Plain boxes for internal or neutral use.
- Aids in warehouse organization and tracking.

Benefits:

- Enhances professional look and customer trust.
- Eases identification, boosting supply chain accuracy.
- Supports export labeling and documentation standards.
- Minimizes sorting errors and handling time.

4. METAL PACKAGING & HANDLING

a. Reusable Metal Racks & Trolleys

Use Case:

- In-plant material movement
- Repetitive handling operations

Benefits:

- Cost-saving through reuse
- Strong and durable structure

b. Metal Pallets for Long-Term Handling

Use Case:

- In-plant material movement
- Repetitive handling operations

Benefits:

- Cost-saving through reuse
- Strong and durable structure

c. Fabricated Transport Fixtures

Use Case:

- In-plant material movement
- Repetitive handling operations

Benefits:

- Cost-saving through reuse
- Strong and durable structure

5. PROTECTIVE & CUSHIONING MATERIALS

RATCHET LASHING BELTS

PROJECT PACKAGING

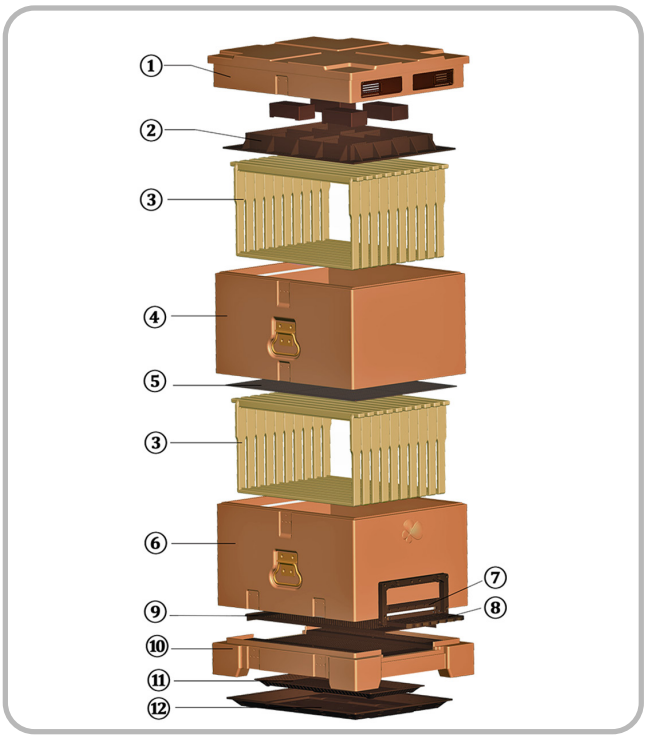

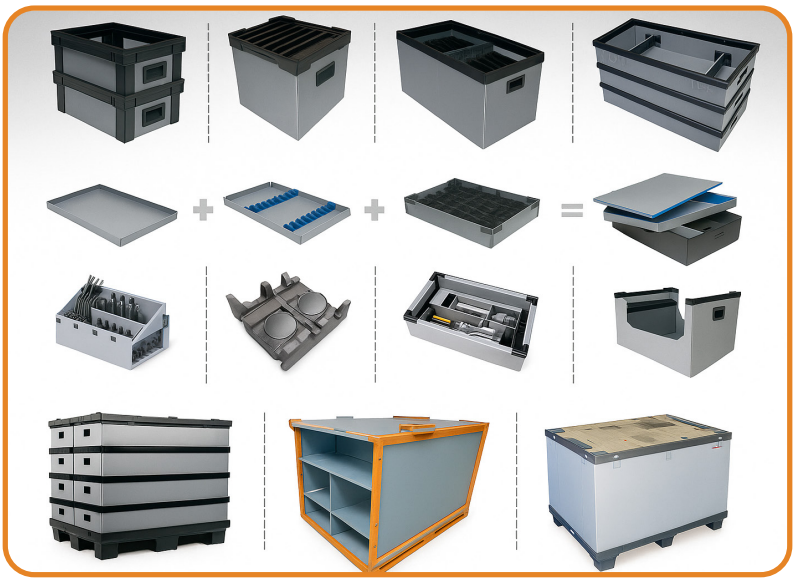

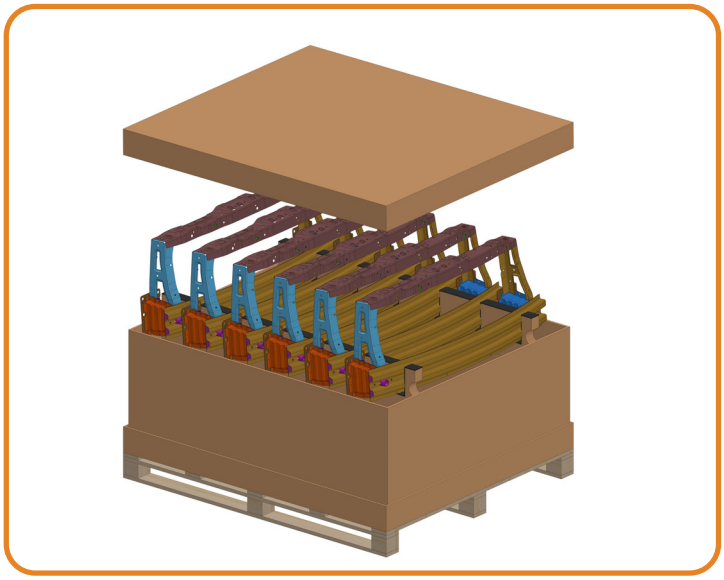

Biodegradable Packaging

- Naturally biodegradable and eco-friendly
- Cuts plastic waste and landfill use
- Promotes sustainability and green adoption

6. DESIGN AND DEVELOPMENT CUSTOMIZED ENGINEERED PACKAGING

We specialize in custom packaging solutions tailored to your product's size, shape, weight, and transport needs. Our designs ensure optimal protection, space efficiency, cost savings, and smooth supply chain integration.

Use Case:

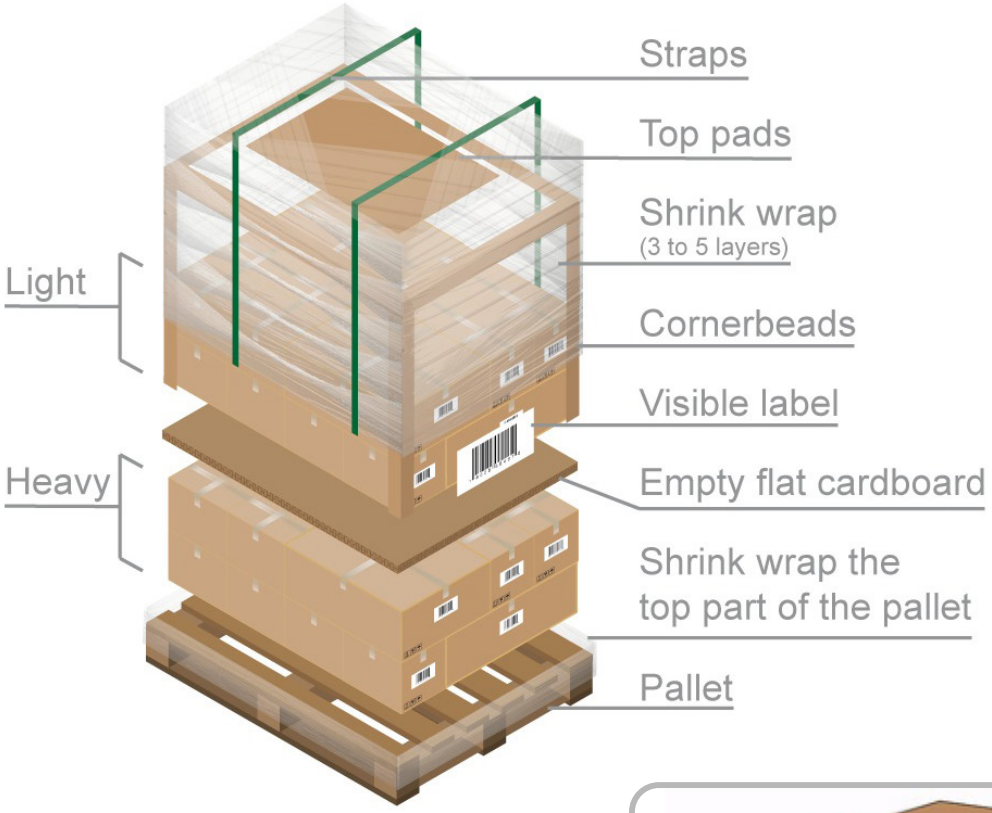

- Designed for product-specific dimensions and handling.
- Ideal for complex, fragile, or high-precision components.

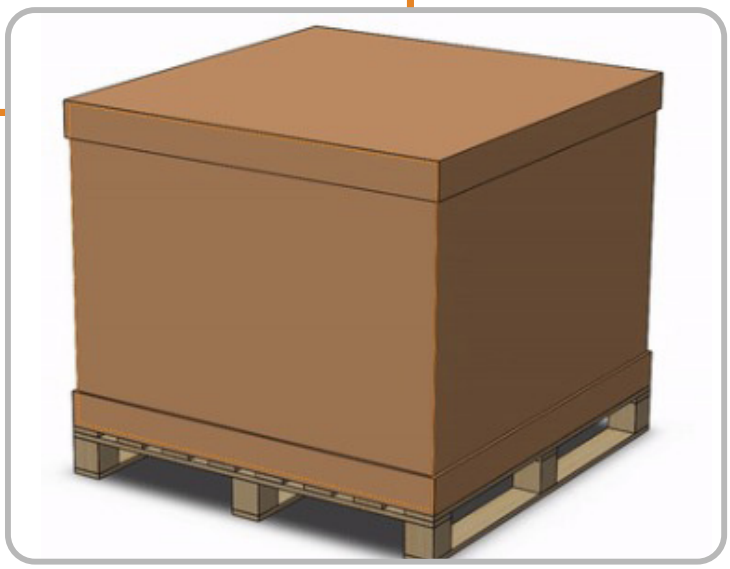

Benefits:

- Provides maximum protection and transit stability.
- Optimizes material use, space, and cost efficiency.

Logistics & Value-Added Services

We offer end-to-end logistics support with value-added services like kitting, labeling, repacking, sequencing, and inventory management. Our streamlined solutions cut costs, boost efficiency, and improve delivery accuracy—so you can focus on your core operations.

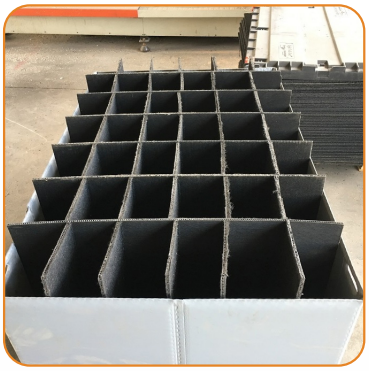

- 5PL Logistics Strategy & Execution with Innovative Concept
- Supply chain design & implementation
- On-Site Packing & Containerization
- In-plant packing support with trained manpower

Customised Material Handling Equipment

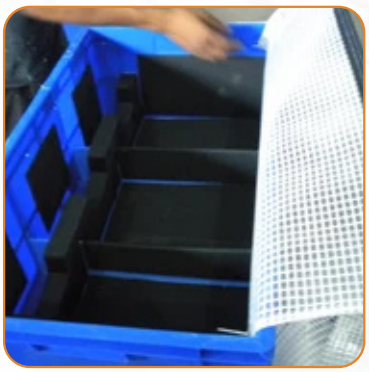

Plastic Bin Repairing Facilities

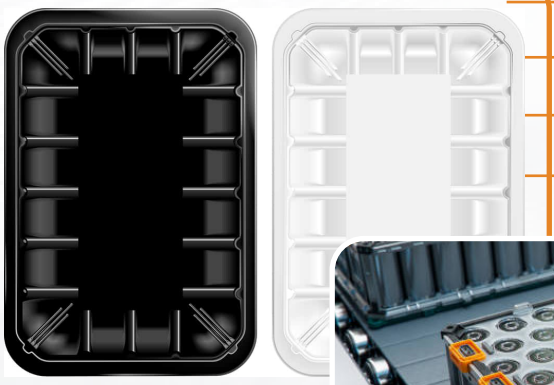

Bin & Tray Cleaning Facilities

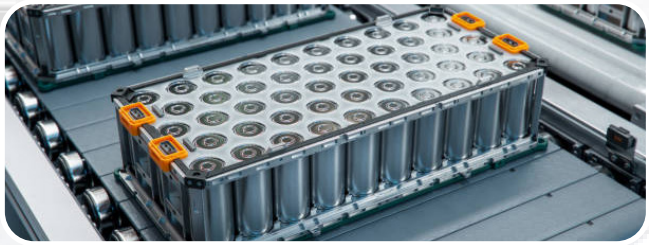

Jss Solution is a very effective cleaner / degreaser that removes left out Oil / Grease Dirt e.t.c from component bins / Trays very easily and quickly

- Non-Toxic
- Non-Hazardous
- Non-Flammable
- Compatible with Plastics
- Water Based Cleaner
- Can be used as a SOAK/IMMERSION cleaner
- Works effectively using Hard/Tap Water
- Effective with Spray wash cleaning machine
- Alkaline pH
- Concentrate Aqueous Cleaner (use diluted)

Electronic EV Packaging

- Shields EV components from damage
- Manages heat for optimal performance
- Boosts reliability and safety in all conditions
- Enhances durability for extended component lifespan

Industries We Serve

We serve the automotive, heavy engineering, machine tools, and export industries with customized packaging and 5PL logistics solutions that ensure safety, efficiency, compliance, and supply chain optimization.
